Permit To Engage in Surface Mining

LAND RECLAMATION COMMISSION

ISSUES TO INDIAN CREEK SAND & GRAVEL

Pursuant to "The Land Reclamation Act," RSMo, 2001, and on conformity with the statements

In the application, a permit is hereby granted to engage in surface mining of

sand & gravel in the state of Missouri. The extent of the

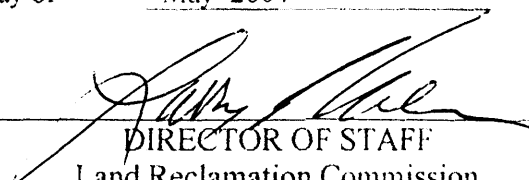

Proposed mining operation(s) will be on 16 acres, more or less.

The locations of the operation(s) under this permit is/are as follows: **Renewal**

County	Section	Township	Range	Acres Renewed	Acres New	Total Acres	Site/Stream Name	Site Number
Franklin	06	40N	01E	3	0	3	Site #1/Big Indian Creek	0600
Franklin	05	40N	01E	3	0	3	Site #2/Little Indian Creek	0601
Franklin	29	41N	01E	10	0	10	Site #3/Big Indian Creek	0599

This permit may be suspended or revoked upon violation of any or all of the conditions set forth in "The Land Reclamation Act," RSMo. 2001, or in such rules and regulations as are promulgated pursuant thereto by the Land Reclamation Commission.

IN WITNESS WHEREOF I have hereunto set my hand this 14th day of May 2004

LAND RECLAMATION COMMISSION

DESCRIPTION OF STREAM CONDITION PRIOR TO LAND RECLAMATION COMMISSION PERMITTING (BY APPLICANT OR PRIOR OPERATOR), INCLUDING BANK CONDITION, BANK VEGETATION AND WATER QUALITY. (Site 1-Main)

The area to be mined involves 3 gravel bars on Big Indian Creek south of the 3rd slab on Big Indian Creek Rd. This section of the creek is bordered by pasture land and some wooded area. There is heavy erosion on the middle bar and everytime the creek comes up it cuts away a portion of land. There are roads leading to all three gravel bars and there would be no reason to disturb the banks. The water quality is good and will at times have green algae from above.

DESCRIBE METHODS USED TO REDUCE DAMAGE TO STREAM BANKS, SUCH AS PROTECTING BANK VEGETATION, IF APPLICABLE.

Excavations will be managed so that there is no way to redirect the stream and a 20 to 25 ft. width of gravel will be left undisturbed between the operation and the streambank. Excavation will not drop below the water line.

DESCRIBE METHODS USED TO REDUCE DAMAGE TO STREAM ENVIRONMENTS, SUCH AS KEEPING ACTIVE MINING OPERATIONS ON GRAVEL BARS, RATHER THAN IN FLOWING WATER, AND KEEPING HAUL ROADS AWAY FROM FLOWING WATER, IF APPLICABLE.

Gravel removal will be restricted to the exposed portions of gravel (gravel bars). We will skim the tops of the gravel bars to a depth no deeper than the normal water level. This will avoid causing erosion of the streambank and channel at the mining site and upstream.

Sullivan, MO 63080 Ph.314-629-4444

DETAILED DIRECTIONS FROM ST. LOUIS TO GRAVEL PLANT--

I-44 to Exit 239. Left over the overpass to stop.
Turn left and go to the road Y.
Go to the right for approximately 2½ miles to junction Hwy K.
Turn right on Hwy K, approximately 6 miles to New Hope Church Rd.
(The Church is on the left). Turn left and go approximately
2 miles to right on Big Indian Creek Rd. for 1½ mile.
If you get to the creek you have gone too far.

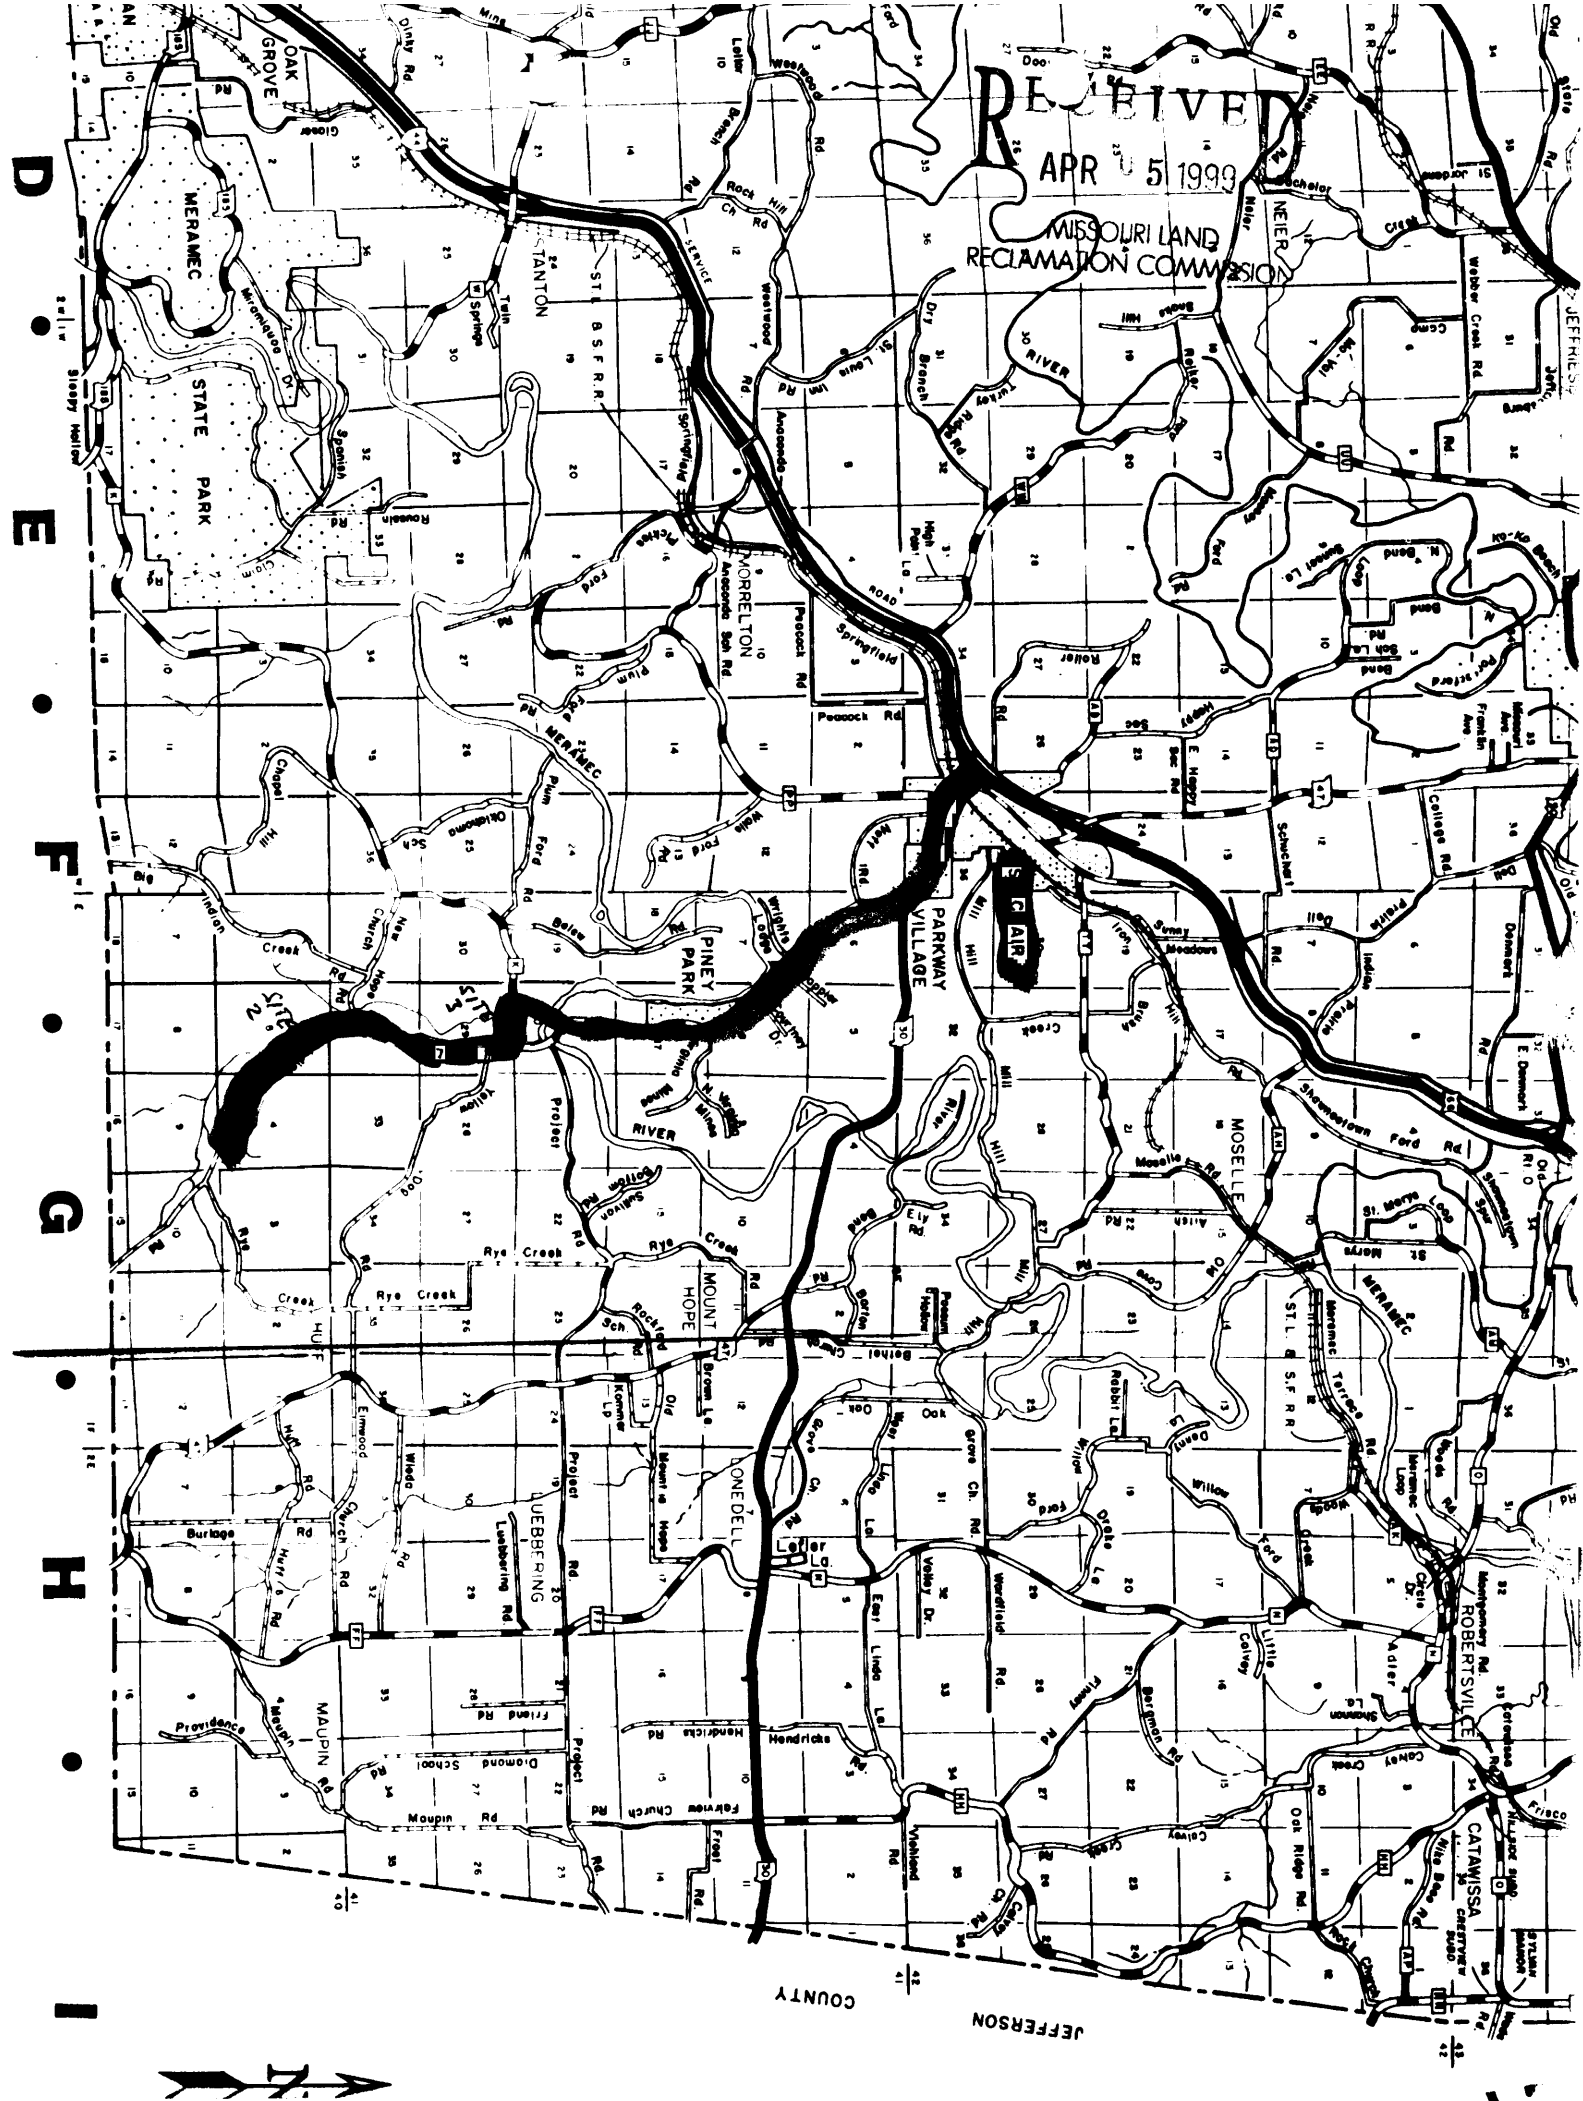

The Gravel plant is visible from the road on the left.
You will have to open a gate to enter the plant.

☒ LONG TERM, FOR PERIOD THROUGH DATE: 2002

RECLAMATION COMMISSION

Company Name: Indian Creek Sand and Gravel

DESCRIPTION OF STREAM CONDITION PRIOR TO LAND RECLAMATION COMMISSION PERMITTING (BY APPLICANT OR PRIOR OPERATOR), INCLUDING BANK CONDITION, BANK VEGETATION AND WATER QUALITY. (Site 2)

The area to be mined involves 2 gravel bars on Little Indian Creek, west of Little Indian Creek Rd. This section of the creek is bordered by pasture land and a strip of trees. There is a road leading to the gravel bars and will have to cross the creek to reach the west bar. The water quality is good and will at times have green algae from above.

DESCRIBE METHODS USED TO REDUCE DAMAGE TO STREAM BANKS, SUCH AS PROTECTING BANK VEGETATION, IF APPLICABLE.

Excavations will be managed so that there is no way to redirect the stream and a 20 to 25 ft. width of gravel will be left undisturbed between the operation and the streambank. Excavation will not drop below the water line.

DESCRIBE METHODS USED TO REDUCE DAMAGE TO STREAM ENVIRONMENTS, SUCH AS KEEPING ACTIVE MINING OPERATIONS ON GRAVEL BARS, RATHER THAN IN FLOWING WATER, AND KEEPING HAUL ROADS AWAY FROM FLOWING WATER, IF APPLICABLE.

Gravel removal will be restricted to the exposed portions of gravel (gravel bars). We will skim the tops of the gravel bars to a depth no deeper than the normal water level. This will avoid causing erosion of the streambank and channel at the mining site and upstream. We will have to cross the stream to access the gravel bar and we will always cross the creek at the same place.

DESCRIBE METHODS USED TO PROTECT WATER QUALITY, SUCH AS INSTALLING EROSION CONTROL DEVICES, IF APPLICABLE.

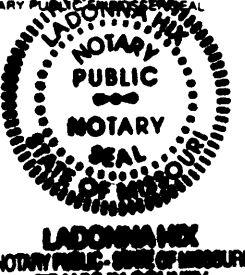

Gravel removal will be restricted to periods of low flow. A twenty-five-foot strip of gravel will be left undisturbed between the excavation and the streamside vegetation. A buffer strip will also be left between the excavation and the flowing portion of the stream.

By my signature, I attest to the following:

- 1) All statements made on this Mine Plan Form are correct, complete, and true, to the best of my knowledge.
- 2) I or the company I am authorized to represent intend(s) to mine in accordance with this Plan, and in accordance with the Missouri Land Reclamation Act, Sections 444.760 through 444.789, RSMo (Supp. 1990), and all rules, regulations, orders, decisions and permits of the Missouri Land Reclamation Commission pertaining to my company's surface mining operations.
- 3) I have a valid agreement with all landowners which gives me the right to grant access to the Director of the Missouri Land Reclamation Commission and his authorized representatives, and I grant such access, and further where I have no right to grant such access, I have attached signed affidavits from the landowners granting such access.
